

 **Schlüter®-CLEAN-CP**

Cleaning polish
for cleaning and polishing metal surfaces

13.1

Product data sheet

Application and function

Schlüter®-CLEAN-CP is a special cleaning polish that is particularly suitable for regular cleaning and maintenance of the surfaces of Schlüter® stainless steel profiles. The product eliminates rust films, deposits, and discolourations as well as minor scratches. Schlüter®-CLEAN-CP may also be used to clean other metallic surfaces made of brass, aluminium and anodised materials and is equally suitable for treating smudges and small scratches on plastic materials.

Material

Schlüter®-CLEAN-CP, which consists of microfine abrasives, oils, solubilisers and emulsifiers, is not a hazardous material.

Material properties and areas of application

Schlüter®-CLEAN-CP has a pasty consistency. It is recommended to test the product on a material sample or in an inconspicuous place to verify its suitability.

Processing

Apply Schlüter®-CLEAN-CP to a dry cloth or directly on the area to be treated and rub it in until a dry, greyish film has formed. Use a clean, soft cloth to polish the area and ensuring to fully remove all residue.

Cleaning polish Schlüter®-CLEAN-CP (50 ml)
